

CONGRESSES AND EXHIBITIONS

Participation in events all over Latin America is an important way to present the organization and a great opportunity to contact our members. The support of the local chapters was essential for planning national events and to communicate them to the local public. The additional presence of international key opinion leaders in many of our events was a further factor that caught the attention of our public.

We were present at selected relevant congresses and exhibitions:

"13° Curso Internacional de cirugía reconstructiva de columna" – SCCOT (Sociedad Colombiana de Cirugía Ortopédica y Traumatología)
