

EDUCATION IN RESEARCH

We believe that research is the key to capacitate surgeons. Our research activities are an integral part of a cycle, designed to have an immediate impact on patient care: the research outcomes are translated into education and the results into clinical practice. Education in research

embraces the full spectrum of appropriate procedures to drive the development of new tools and methods and to find new answers. **All AO Clinical Divisions** are invited to participate on all research education events (online & face-to-face).
