# ***EDUCATIONAL ACTIVITIES 2018***

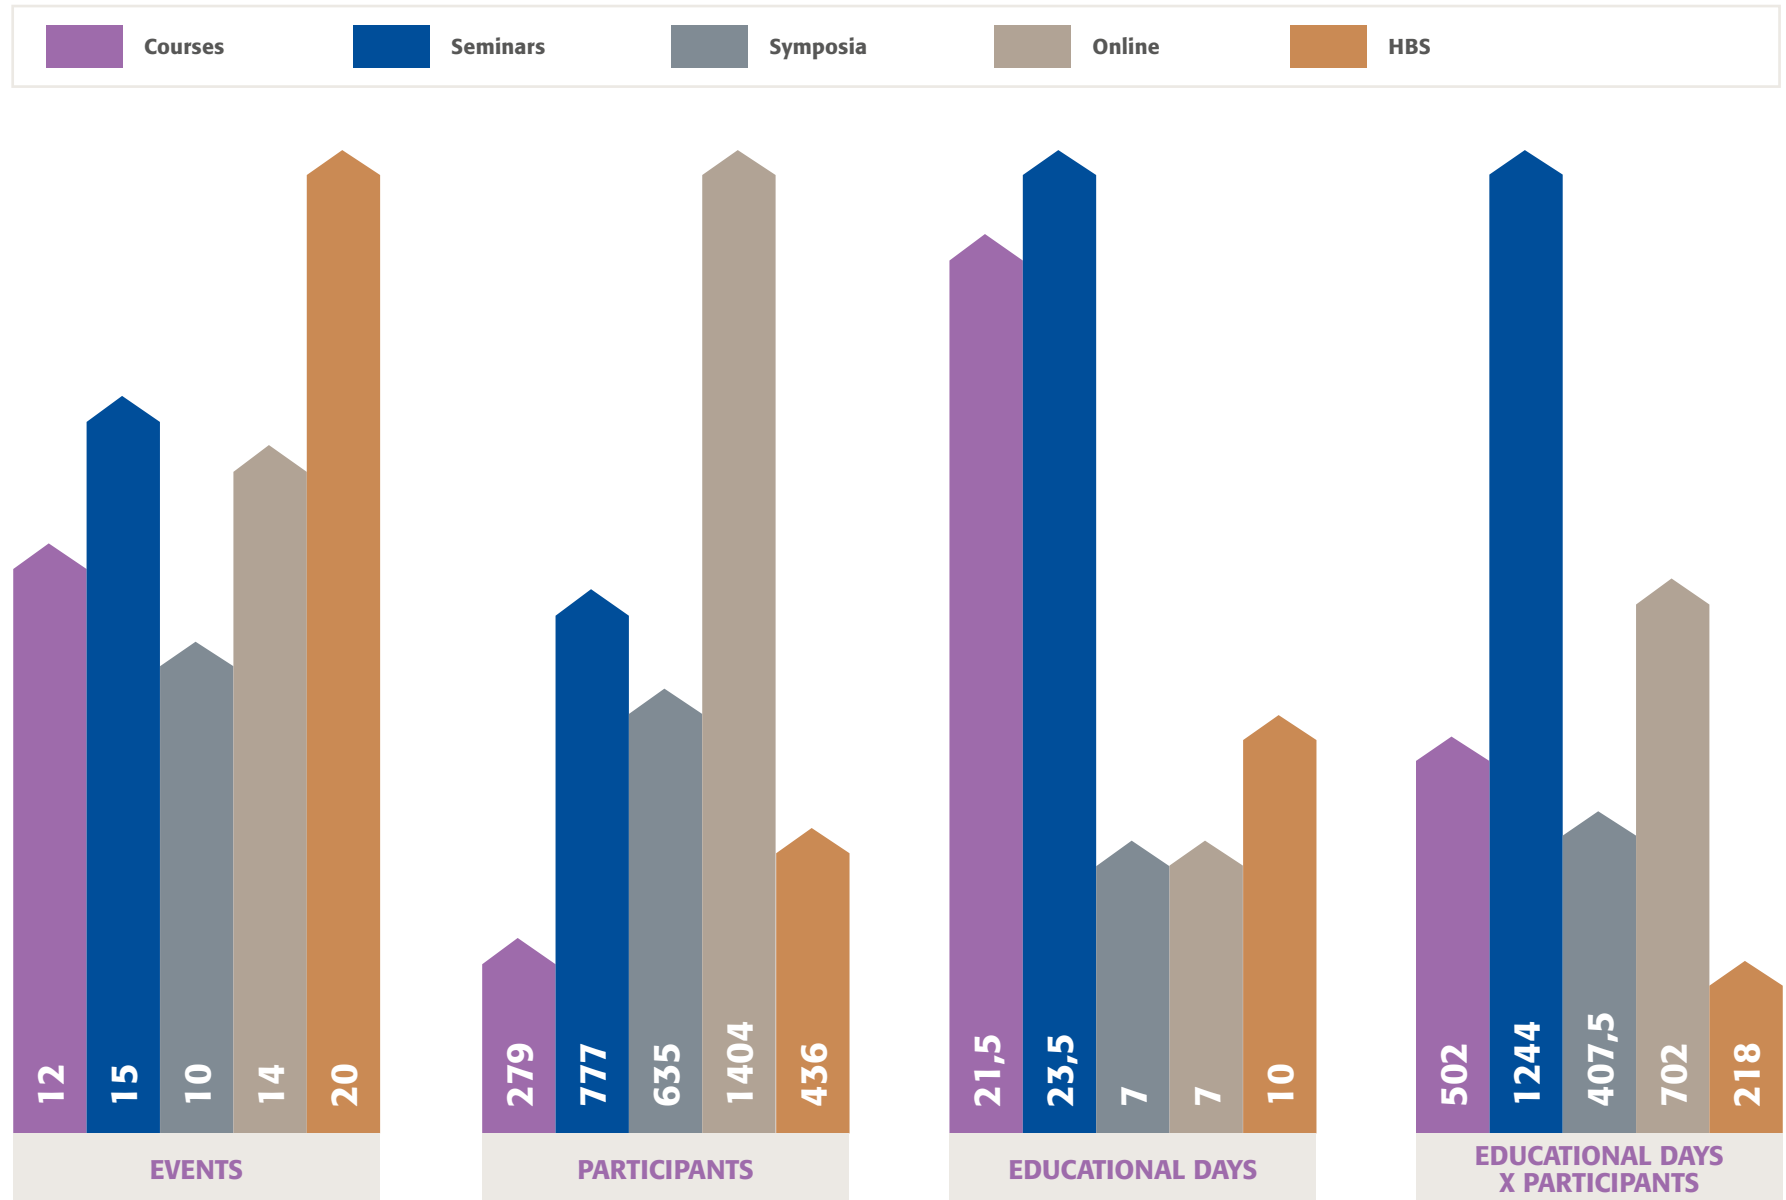

## EDUCATIONAL ACTIVITIES STATISTICS

Once again our numbers show an increase in the amount of participants and educational offers for our audience. Important academic events, virtual learning, anatomical specimen courses and symposia were performed throughout 2018. All the events were curriculum-aligned and had their programs based on the AOSpine Principles, competencies and learning outcomes, which decidedly enhanced the quality of the educational offers.

# ONLINE EVENTS

Online events are more convenient and allow more interaction between Faculty and participants. The best thing about online learning is that one can learn in a relaxed manner. All lectures and needed material are provided via online platforms, so it is possible to easily access them from the comfort of home.

The virtual events are a member privilege and are available to our public via individual internet access or in auditoriums

# ONLINE ADVANCED COURSES

These courses are discussion of clinical cases. Courses are made of six modules and given on Saturdays with two hours duration.

Each module counts with the participation of experienced Faculty from different countries of Latin America. The interaction between participants and lecturers allows a better learning experience.

# ***EDUCATION IN RESEARCH***

## EDUCATION IN RESEARCH

We believe that research is the key to capacitate surgeons. Our research activities are an integral part of a cycle, designed to have an immediate impact on patient care: the research outcomes are translated into education and the results into clinical practice. Education in research

embraces the full spectrum of appropriate procedures to drive the development of new tools and methods and to find new answers. **All AO Clinical Divisions** are invited to participate on all research education events (online & face-to-face).
